

Internet Explorer 10

ProjectWeb detects the type of browser that visitors use and may display a message advising that a browser is not supported. Internet Explorer 10 (IE10) in its default configuration is likely to be affected. The following work around is offered for IE10 users:

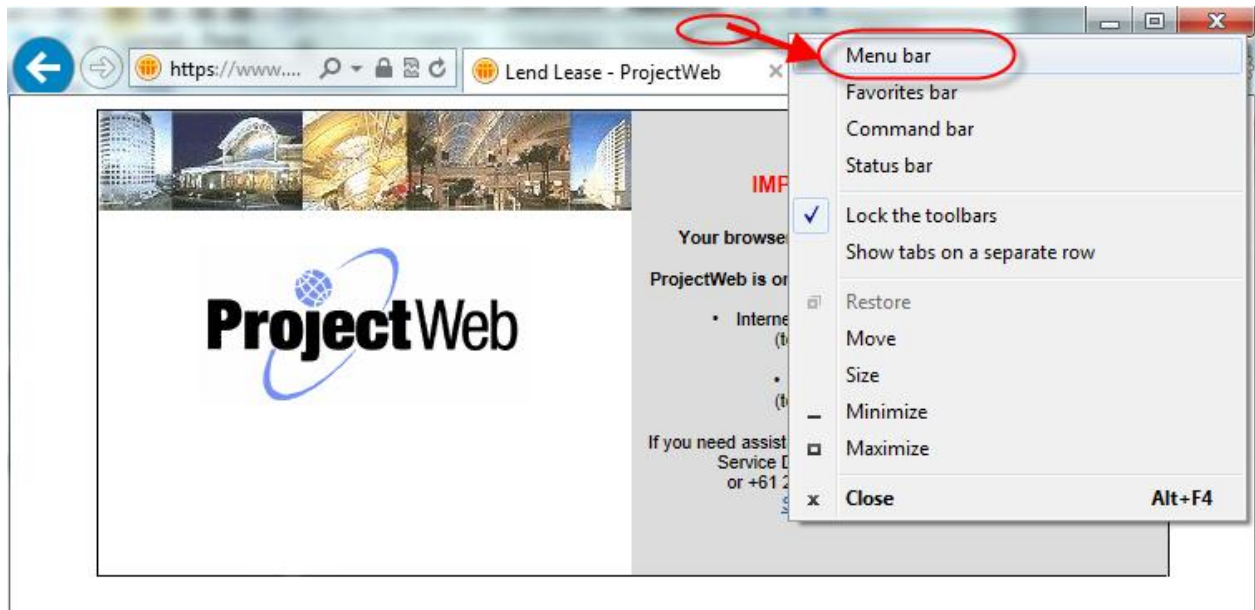

ProjectWeb should work successfully in IE10 as long as 'Compatibility View' is activated. To activate 'Compatibility View', please click on the icon highlighted in the screenshot below:

In some cases the icon may not be displayed. In this case 'Compatibility View' can be activated from the 'Tools' menu as shown in the screenshot below:

If the 'Tools' menu is hidden it can be added by right clicking on the top of the window and selecting 'Menu bar' from the context menu as shown below:
